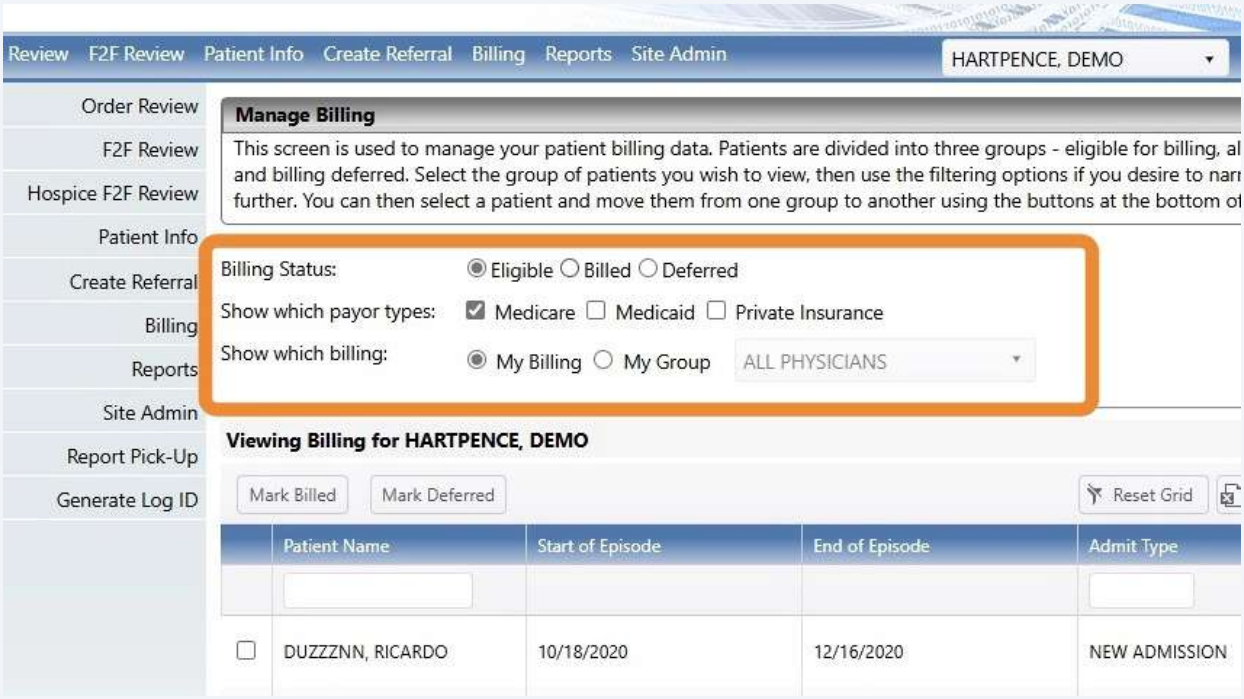
Provider Link: How to View Billing Data

This guide offers essential insights into navigating the Provider Link platform for efficient billing data management. By detailing how to filter and track eligible patients, generate reports, and utilize Excel exports, it empowers providers to streamline their billing processes. Viewing this guide will equip providers with the tools needed for effective billing oversight and patient management.

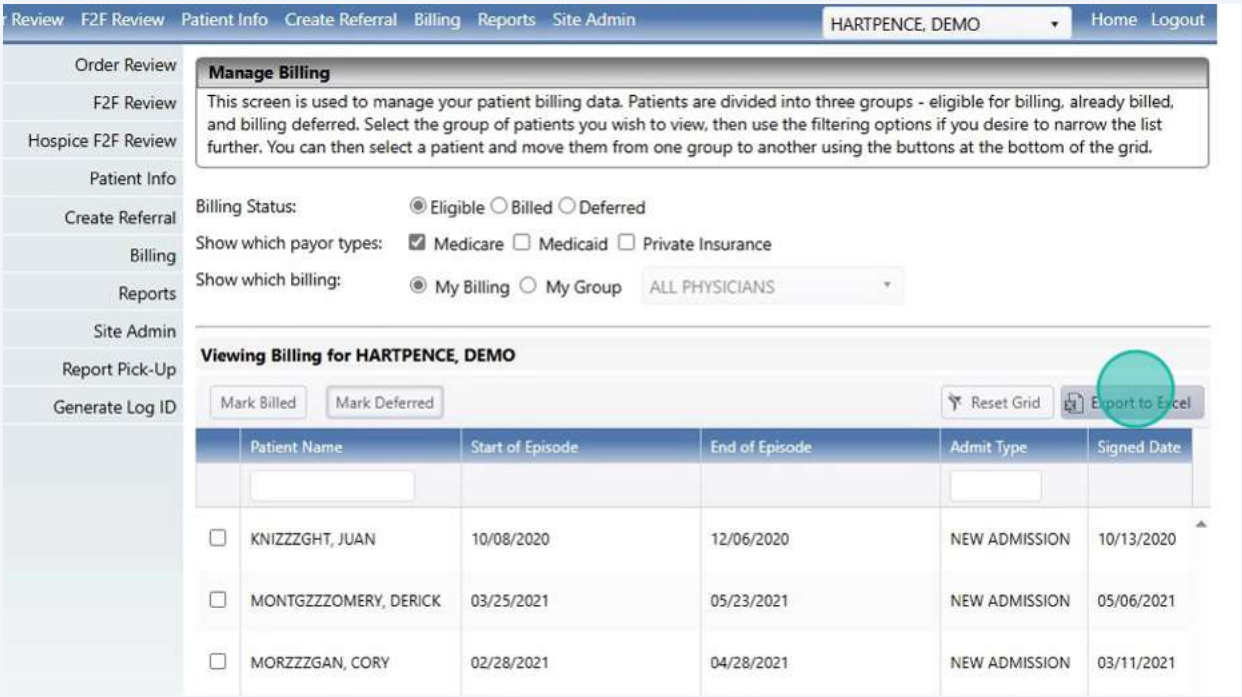
1 When logged into Provider Link, navigate to the *Billing* tab.

2 Here, the provider can see which patients are eligible for billing. They can filter by status, payor, and also view patients assigned to physicians within their group.

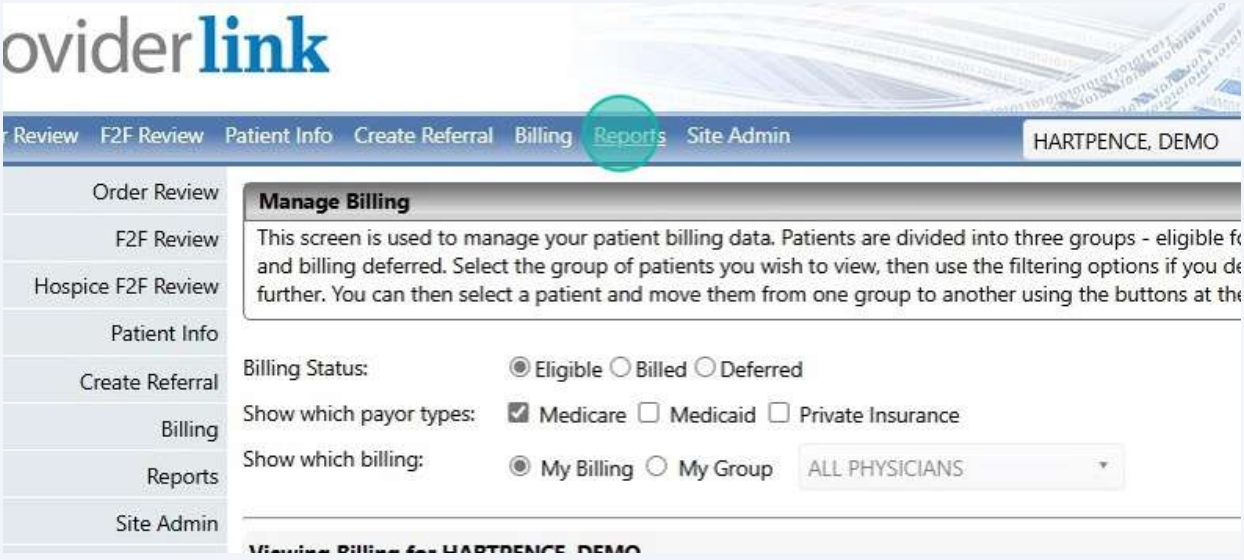


3 The physician can mark these as billed or deferred depending on review.

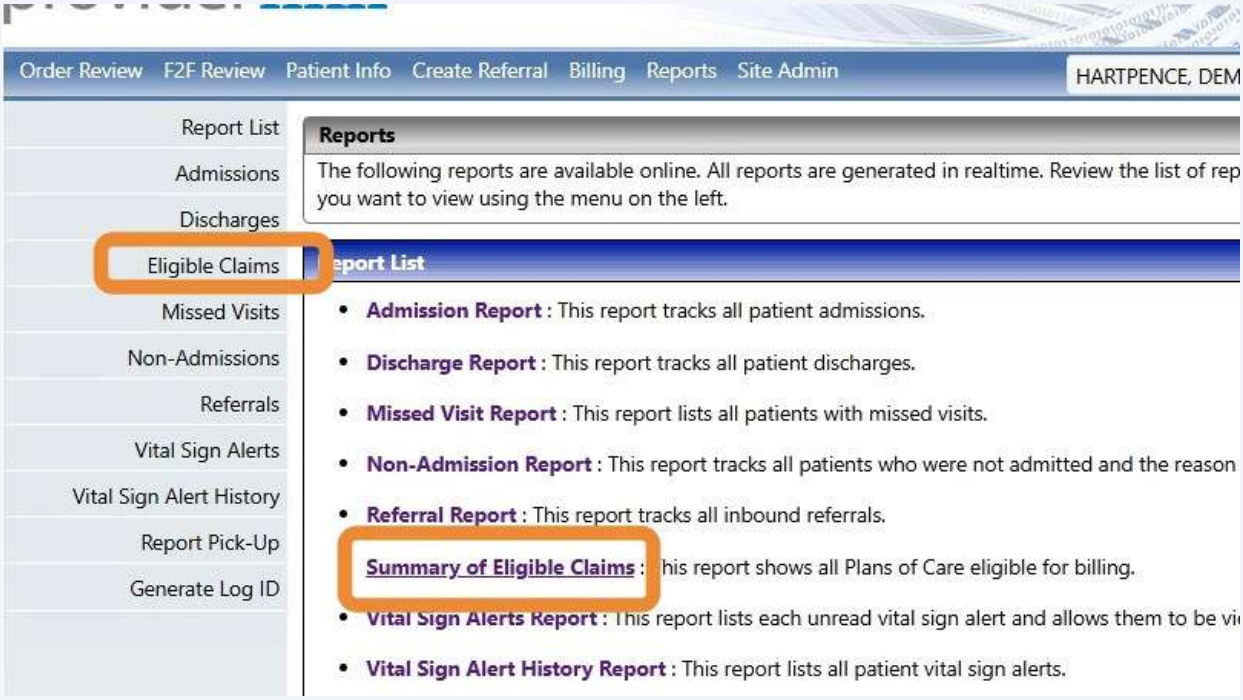
4 Providers can click *Export to Excel* to generate a snapshot of all selected patients for easy review and tracking.



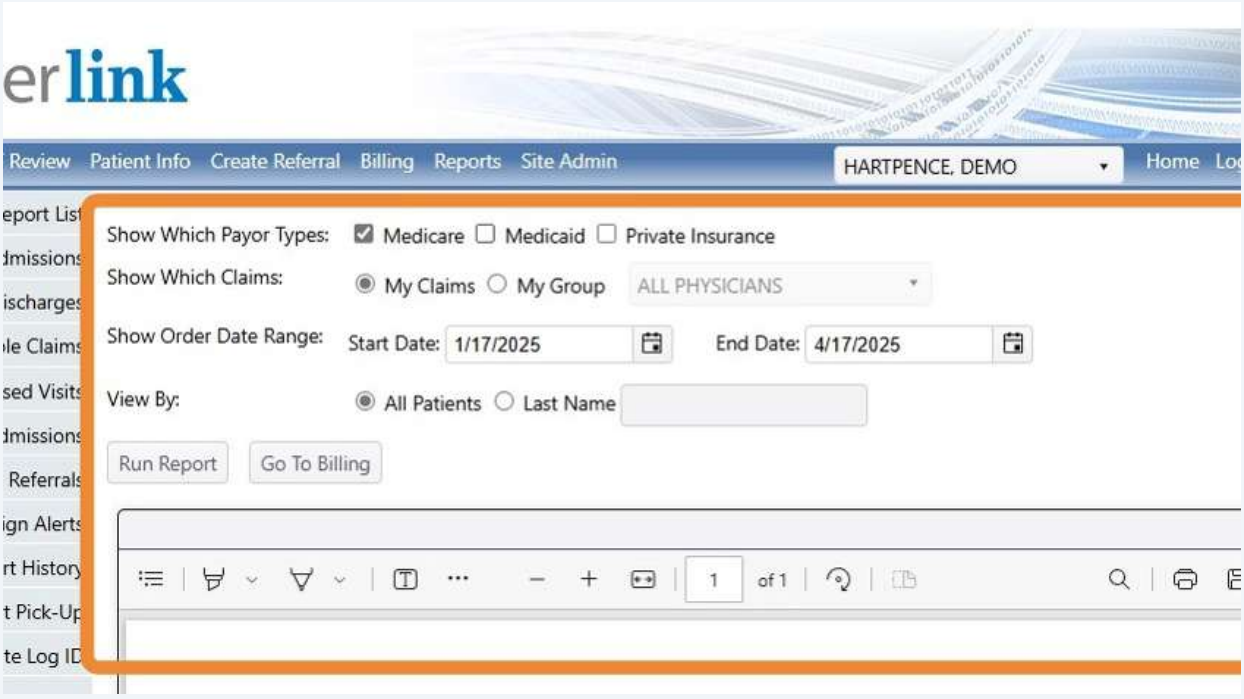
5 Reporting is also available to view eligible claims. Head over to the *Reports* section using the link in the blue menu.



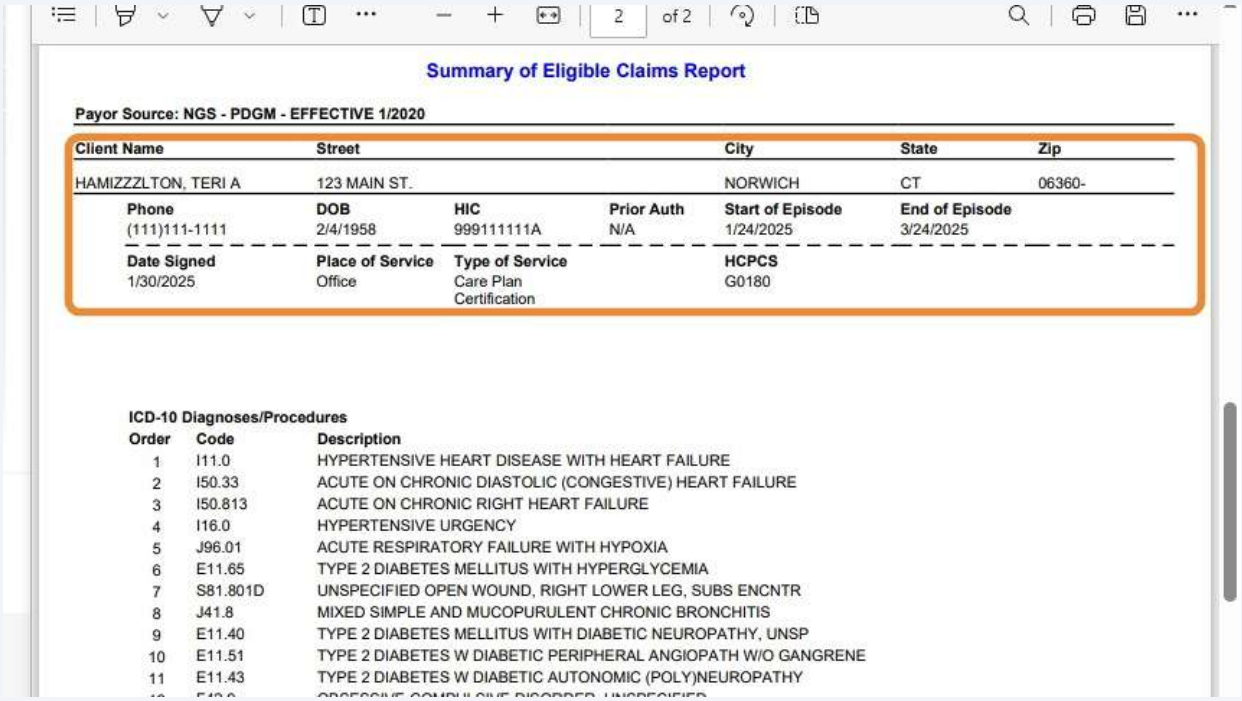
6 Click "Summary of Eligible Claims." This will display the Plans of Care available for billing. Either link will open the report.



7 The report has multiple filters for convience. There is a Payor type filter, if the provider wants to view their claims or their physician group's cliams. Date range and view by patients.



8 The report will display patient information, including Place of Service, Types of Service, and HCPCS codes, along with an overview of the associated Diagnosis Codes. Providers can enhance patient care, ensure accurate documentation, and facilitate effective communication within the care team.



Summary of Eligible Claims Report
